## Derating Curve

Static Characteristics

## Standard Application

## Operation without dimming:

Io operates at rated current without dimming function when the pins of analog DIM and PWM DIM keep open

PWM Dimming Control:

Io adjustment by PWM Signal

During PWM dimming operation, 10 will change with the PWM duty (PWM Signal: $1 \mathrm{~K} \sim 10 \mathrm{KHz}$ )

## Analog Dimming Control:

Io adjustment by DC voltage

During analog dimming operation, Io will change with DC input voltage
